(54) DISPATCH METHOD FOR APPLICATION STEP IN CLIENT/SERVER ENVIRONMENT AND SERVICE PORTAL SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a system for dispatching an application step.

SOLUTION: A dialog is transmitted to an application server 102c for executing a principal section of the application via the Internet and/or an optional cooperative network, and the application forms an output including the following set of possible user dialogs. The application is defined as a program for executing a cycle transferring the output to a user and a cycle waiting for the user dialog. The application uses other parts called steps 110a-109b or divided into different parts enabling direct handling of a single user dialog.
